

**Monroe County Health Priority Meeting – MINUTES: Health in All Policies**

**Key West City Hall, 1300 White St. Key West;** Friday, June 14, 2019; 1:30pm to 3:00pm

**General Overview:** The purpose of this meeting is to share information in an open forum about one of Monroe County’s health priorities identified in the Community Health Improvement Plan -- Health in All Policies (HIAP) —and strategize actions steps for the improvement of health among residents.

Time	Topic	Minutes
1:30pm	<p>Welcome/Call to Order</p> <ul style="list-style-type: none"> <li>- Introductions (in person and phone line)</li> <li>- Overview</li> </ul>	<p>Jody Gross, Chair called meeting to order. Alison made initial introductions of CHIP/CHA (Community Health Improvement Plan/Community Health Assessment)</p> <p>Participants introduced themselves: Donna Stayton (DOH-Monroe), Priscilla Bennett (DOH-Monroe), Tim Staub (City Key West), Esneider Gomez (AH Monroe, Deputy Director), Joe Laino (S FL Beh Health), Katie Atkins (on behalf of Monroe County Commissioner, Michelle Coldiron), Megan Hall (Catholic Charities), Sean Brandenburg (Key West Police Chief), Mike Davila (Key West Fire Dept), Erin Donald (FL Keys Healthy Start Coalition), Susan Moore (Monroe County Coalition), Clayton Lopez (Key West Commissioner), Carol Schrek (on behalf of Monroe County Commissioner, Heather Caruthers), Cali Roberts (Womankind), Kim Romano (on behalf of City of Key West Commission), Bob Eadie (DOH-Monroe Administrator), Alison Kerr (DOH-Monroe).</p> <p>Jody gave an overview of CHA process, started in Fall 2018 and shared results of CHIP/CHA, available on DOH-Monroe website as of March 2019. Monroe County’s health priorities, identified via the CHA, and in no particular order: Health in All Policies (HiAP), Mental Health and Substance Abuse, Access to Care. HIAP overlaps with the other two other issues implementation of HiAP can positively impact the health of the community (i.e. Flint MI water crisis, planning public transportation to improve access to care).</p>
1:45pm	<p>Presentation: What is Health in All Policies</p>	<p>Donna Stayton, DOH-Monroe, provided an overview with additional examples of HIAP. IAP looks at every decision made by a business or government agency. Businesses and municipalities are encouraged to participate, in addition to health care providers. Donna then asked group to provide other examples and/or comments.</p> <p>Tim Staub (City of Key West): Road design, which is a key issue in traffic collisions, especially regarding redesigning right of ways. Engineers, staff play a role in improving safety of right of way. Chicago has a transportation hierarchy in which pedestrians are primary focus. Tim will share this with the workgroup.</p> <p>Sue Moore (Monroe County Coalition): Alcohol policies surrounding beer and alcohol sales at children’s events. For example, at a family oriented community event – there was a beer truck present with parents holding a child’s hand while also holding a beer cup. Plays a role in setting examples for children and safe driving.</p> <p>Kim Romano (City of Key West): There is a new link available to anyone wishing to report problems in the City, such as sidewalks. Allows residents to report issues for a timely response and take action.</p> <p>Bob Eadie (CHD Administrator): Elected officials make policies. Action is contingent on how we place HIAP on frontlines. Law enforcement and Fire Rescue, present at this meeting, have a role as well. Elected officials should be able to ask re: the overall needs of the community and set priorities from there. Crosswalk placement; scooter/bike accidents are common. We need to plan to ensure safety of tourists and residents.</p>

		<p>Donna Stayton (CHD): Louisville Kentucky had a bike rally that did not have bike racks. The city and mayor created Healthy Hometown Movement which uses HiAP.</p> <p>Sue Moore (Monroe County Coalition): provided additional examples, including problem with too many chickens in Key West and the underlying health issues associated with droppings, such as potential to spread disease. Iguanas also have potential to spread disease among other problems they pose.</p> <p>Donna informed the group that Health Department funding is available for a subject matter expert to provide training/education.</p>
2pm	<p>Overview of Previous Meeting and Summary</p> <ul style="list-style-type: none"> <li>- HIAP Goals and Objectives</li> </ul>	<p>Alison Kerr, DOH-Monroe, provided details on strategies and reviewed the handouts provided: 1) an FAQ for HiAP; 2) a summary of the HiAP Goal from the CHIP. Partners were asked to provide potential dates for a training. She will be sending a doodle poll along with other action steps for partners. She also highlighted the summary sheet, which includes action steps for partners, including need to add more partners to the HIAP workgroup.</p>
2:15pm	<p>Discussion:</p> <ul style="list-style-type: none"> <li>- HIAP Strategies</li> </ul> <p><i>Action Items:</i></p> <ul style="list-style-type: none"> <li>- <i>Determine anticipated date for training.</i></li> <li>- <i>Identify additional community partners to be involved.</i></li> <li>- <i>Identify potential/existing examples from partners.</i></li> </ul>	<p>Donna led discussion on strategies (refer to summary handout with outcome indicators and strategies for 2019-2022). She stated that current plan is for subject expert, Dr. Sandra Whitehead (or other) to do one training here in Key West and one in the Upper Keys. . If partners are interested in doing presentations as well as the Health Department, let Alison know. Our goal is to conduct one presentation per quarter.</p> <p>There are 53 media channels on Alison’s list. We can reach out to one media channel per quarter to educate on topic. Goal is to meet 12 total by 2022. Workgroup can assist with soliciting earned media, for example, Mike Davila with Monroe County Fire Rescue does a weekly radio spot on US 1 radio.</p> <p>Goal is to reach 25 decision- makers on the topic. DOH cannot meet this goal alone, so partners are asked to contribute.</p> <p>Jody suggested picking one or two items that the group can focus on and partners can work on within their respective agencies.</p> <p>Tim Staub provided example, Vision Zero, which cities and now states are implementing, to get to zero deaths/major injuries in the right of way. Hits home with improving health of all members of our communities (pedestrians, motorists, bicyclists).</p> <p>Esneider Gomez (AH Monroe): Requested for clarification on workgroup action—is HIAP a policy about policies? Need to determine what health implications are involved in determining decisions, adding a new lens for any decisions being made. Donna indicated that Dr. Whitehead, or other subject expert can provide further clarification for our partners. AH Monroe is constantly looking at policies and health implications of such policies. They have numerous policies, but need to know how to report them to us.</p> <p>Mike Davila (Key West Fire Rescue): understands that Monroe County has a low rate of residents with health insurance. He indicated a need for people to get health insurance, and that policy development would encourage and improve this.</p> <p>Meagan Hall: (Catholic Charities): there is an ongoing issue with transportation for residents. There should be a policy for transportation that allows low income residents to be able to get to their doctors’ appointments. Jody concurred and indicated adequate transportation for access to care has always been a struggle in our rural, oddly shaped county.</p> <p>Mike Davila addressed alcoholism in the county. Bob added that we don’t have enough alcohol and substance abuse resources in the county. We have the highest number of alcohol vendors and use among youth. Can we implement a program to reduce DUIs? There are financial and health impacts related to DUIs with Monroe County tax payers support</p>

		<p>much of the costs of DUIs. Bob quoted: "Never doubt the power of a small group of citizens that can change the world." Margaret Mead.</p> <p>Clayton Lopez (City of Key West Commissioner): shared that not only is the City implementing health in their strategic plan, but they are also using information from the health department's CHA/CHIP. Information is embedded within their documentation. Clayton said the City should be on board with HIAP.</p> <p>Cali Roberts (Womankind): suggested using a checklist of 5 items for HIAP for each agency to determine if criteria are met. Checklist should have specific information on what to look for when looking at a policy. Joe Laino of S FL Behavioral health shared information about opening for health impacts; HIAP is needed and recognized. There is a need for Dr. Whitehead to clarify if the workgroup should determine specific policy or specific action within the agencies.</p>
3pm	Review of Action Items	<p>Alison Kerr, DOH-Monroe</p> <ul style="list-style-type: none"> <li>- Alison to send doodle poll to determine meetings while asking partners to share any other partners who are not listed in handout. Alison to add Womankind to the list. Discussion by all regarding presentation to County BOCC and Key West City Commission. Suggestion made to meet with some Commissioners one on one to obtain buy-in prior to Commission meetings. Bob suggested we can arrange for subject matter expert to present at the commission meeting and then have training (can be same day). f</li> <li>- Alison to follow up with subject matter experts regarding checklist as suggested by Cali Roberts.</li> </ul> <p>Jody thanked everyone for coming; Meeting adjourned 3:10pm by Jody Gross, Chair.</p>
